

The MinnSNOWta ROOF RAZOR roof rake is an industrial quality tool designed for removing snow from roofs. This helps prevent ice dams and snow loading, both of which can damage your roof.

### **The Quickest and Safest Way Possible to Remove Snow From A Roof!**

The double cutting surfaces of the MinnSNOWta Roof Razor® roof rake head allow the Roof Razor® to remove snow by undercutting deep or drifted snow. The snow eventually collapses by its own weight onto the poly chute and slides off the roof. Poly wheels keep the roof above the surface preventing damage to frozen shingles. No other snow rake is faster. No other snow rake is easier.

A standard roof rake removes snow by scraping across the roof. As you can see, this can damage the roof's shingles. The MinnSNOWta Roof Razor® uses wheels which roll on the shingles, preventing damage to your roof.

### **The Perfect Home Snow Rake**

The MinnSNOWta Roof Razor® roof rake doesn't rely on brute strength. A simple push is all that is needed to clean snow off your roof. The Roof Razor® snow rake makes it simple to

eliminate ice build up and prevent damaging ice dams. Because of its light weight and design, as long as you can reach the roof, you can use a Roof Razor®. Here the inventor's daughter is easily removing heavy, wet snow. Notice that at one point she uses just one hand to push the Roof Razor® to the top of the roof. At the end you can see how easy it is to lower the Roof Razor® to the ground when you're finished using it.

### **The Perfect Commercial Snow Rake**

Simplicity of design, strength, and ease of use make the MinnSNOWta Roof Razor® more efficient and profitable for commercial roof cleaning. Ideal for home, cabin, and winter resort owners.

### **Dual Cutting Action**

The MinnSNOWta Roof Razor® will cut a tunnel into even the deepest snow-covered rooftop. Dual cutting action created by the axle and the upper bar slice through all snow types like a sharp knife. Watch volumes of snow collapse onto the slide chute and quickly slide safely off any shingled or metal roof. The wide-cutting head saves time and gets even the biggest jobs done in no time. The Roof Razor®'s design protects cold roof surfaces from chop damage that is inflicted by conventional roof rakes. Poly wheels keep the lowest cutting edge one inch above the shingles.

## Ergonomically Designed

The first section rests on the edge of the roof until you have cleared as much snow as you can easily reach. A second, third and fourth pole section extend your reach. Simply push the razor head upward into the snow on the roof and watch the snow slide down the chute. Gravity is doing all the work.

## Strong and Durable

The most impressive feature about the MinnSNOWta Roof Razor® is its durability. It will be the last snow rake you will ever purchase to clear snow from your roof. Manufactured from tough aluminum and steel, the Roof Razor® will endure severe winter climate abuse in temperatures as low as 40 degrees below zero. This is an industrial quality roof rake, and a worthwhile investment. A necessity for both private home owners and commercial maintenance crews.

## Made In The USA

Designed, built and tested in Minnesota by people who know cold and snow. Just grab the pole and push with your feet firmly planted on the ground. No ladders! No need for brute strength! A simple push is all that's need. The Roof Razor® is designed to remove snow *quickly and efficiently* saving you time outdoors in poor weather conditions. From teens to seniors, the Roof Razor® is easily operated. This snow cleaning/snow removal system is designed for long lasting durability and simple and efficient use.

# Product Details

## **Titan Roof Razor®**

The razor head is constructed of 3/16" aluminum flat stock and is 36" wide and 6" high. Overall assembled length is 24 feet. 10 foot long slide chute attaches with bungee cord to the third handle section. Strong, lightweight aluminum handle system consists of four 6-foot snap-connected sections. Shipping weight: 17 pounds. \$149.95

## **Champion Roof Razor®**

The razor head is constructed of 3/16" aluminum flat stock and is 36" wide and 6" high. Overall assembled length is 24 feet. 5 foot long slide chute attaches with bungee cord to the second handle section, and the 5 foot slide is interchangeable with the ten foot slide. Strong, lightweight aluminum handle system consists of four 6-foot snap-connected sections. Lighter and easier to use than the Titan Roof Razor®. Shipping weight: 17 pounds. \$139.95

## **Dynamo Roof Razor®**

The razor head is constructed of 3/16" aluminum flat stock and is 24" wide and 6" high. Overall assembled length is 24 feet. 10 foot long slide chute attaches with bungee cord to the second handle section, and the 5 foot slide is interchangeable with the ten foot slide. Strong, lightweight aluminum handle system consists of four 6-foot snap-connected sections. Lighter and easier to use than the Titan Roof Razor®. Shipping weight: 13 pounds. \$124.95

## **6 Foot Long Extra Pole**

Extra 6 foot long pole. Fits all Roof Razor® models. Shipping weight: 2 pounds. \$20.00 each.

## **Metal Roof Kit**

Optional 4-inch wheels for metal roofs. Also necessary for some shake roofs and tile roofs. Fits all Roof Razor® models. Shipping weight: 1 pound. \$15.00

## **Vinyl Roof Kit**

Rounded 4-inch wheels for vinyl and membrane roofs or plastic roofs on inflatable-type buildings such as airdome hockey arenas. Fits all Roof Razor® models. Shipping weight: 1 pound. \$22.50

## **Replacement 10 Foot Slide**

Replacement 10 foot long slide. For the Titan Roof Razor®. Shipping weight: 2 pounds. \$22.50

## **Replacement 5 Foot Slide**

Replacement 5 foot long slide. Overall length is 5 feet. For the Roof Razor® #5. Shipping weight: 2 pounds. \$13.50

## **Dynamo Roof Razor® Replacement Slide**

Replacement Dynamo Roof Razor® slide. Overall length is 10 feet. Shipping weight: 2 pounds. \$20.00

# Frequently Asked Questions

## **Does the Roof Razor® work on a shallow pitch roof?**

Yes, it does.

## **Does the Roof Razor® work around dormers and angles?**

Yes, it does.

## **Does the Roof Razor® go over electrical roof heater tapes?**

Yes, the wheels roll over electrical tapes, leaving them fastened as they were.

## **Are there any problems with vent pipes?**

No. No snow collects on a vent pipe, so you simply go to the left, go to the right, and go around without having to remove the Roof Razor® from the roof. The same is true of chimneys.

## **Can you use a Roof Razor® on a metal roof, a tile roof, or a roof with architectural shingles?**

Yes, by adding a metal roof kit to your order.

## **What's the difference between the Titan and the Dynamo?**

The Titan is best for very large roofs, especially metal roofs. It will move massive amounts of snow quickly. The Dynamo is best for cutting through heavier snow accumulations (12 inches or more) because of a smaller cross section. The Titan razor head is constructed of 3/16" aluminum flat stock and is 36" wide and 6" high, while the Dynamo razor head is constructed of 3/16" aluminum flat stock and is 24" wide and 6" high. The Dynamo is 30% lighter than the Titan. It's easier to get up onto the roof, to work sideways, to get into dormer areas and around standpipes and chimneys.

## **Does the Roof Razor®'s weight present any problems?**

No. While there are lighter-weight products, none remove snow like the Roof Razor® does. Where there have been concerns, it has been that the product was too light weight to do the job.

**Is the Roof Razor® slide plastic?**

No. The slide is specially treated cloth that is slippery to snow yet stays flexible in the cold.

**How long will the slide last?**

It depends. Sharp edges will cause cuts, for example. But used properly, the slide should last for several years.

**Does deep snow on a roof cause problems?**

No. The Roof Razor® easily removes snow two and three feet deep.

**What's the maximum roof height the Roof Razor® can handle?**

The lowest edge of the roof should not be more than 18 feet from the ground. Beyond that height, the angles get too complicated.

**What's the difference between the MinnSNOWta Roof Razor® and less expensive products?**

1. Better design
2. Better quality
3. Better performance
4. Longer durability
5. Better investment - the Roof Razor® is an investment for your home or business maintenance.
